

Chemical-free Iron/Odor/Taste Filter

McKay's
ESTD CO. 1927

Celebrating 97 years!

OVERVIEW

The control valves are state of the art automatic valves that cover a broad range of global applications. They are designed for residential, commercial and industrial use. Cycles can be set for downflow or upflow regeneration, or simply service, backwash and rinse. They are simple to configure for use in multiple tank systems as well.

The valves have a complete line of accessories including stainless steel flow meters, motorized alternating valves, no hard water bypass and system controllers.

IRON & ODOR BENEFITS

Chemical Free

No more iron stains

Life expectancy 15-20 years.

Plumbing fixtures protected against iron buildup

No more musty taste or bad odors

Longer product life and improved performance

FEATURES

- 1-2 Cubic Foot Capacity
- Four methods to initiate regeneration; *meter immediate, meter delayed, time clock delayed or pressure differential*
- Fully adjustable 6-cycle control delivers controlled backwash, downflow brining/slow rinse, second backwash, fast rinse, refill and downflow service
- Backwash and brining ability to 22" diameter tanks
- Downflow regeneration
- Control valve design provides optimum service and backwash rates
- Mixing Valve option available
- Reliable and proven DC drive
- Iron and odor-reducing filter
- Tank jacket reduces tank sweating
- Tank jacket has a zipper for easy removal and can be washed
